IN THE SPECIFICATION

On page 12, lines 10-15, please amend the specification as follows:

With Bridge 415 and Interface 460, non-scriptable Interface 410 can access Intermediary 499 and any API using Intermediary 499 can access Interface 410. The same mechanism is used in the other corresponding bridge and interface pairs. A complete description of the mechanisms and interfaces involved in connecting a scriptable plug-in API to a non-scriptable plug-in is described in co-pending U.S. patent application "Scriptable Plug-In Application Programming Interface", Sr. No. 10/023,008 filed on December 21, 2001.
